

Facilities Maintenance Specialist | George Hastings

To the Parents of Tillamook Bay Community College students:

This letter is to inform you of the Integrated Pest Management (IPM) law enacted on July 1, 2012 that Oregon Schools must abide by (ORS 634.700-634.750). We are required to notify staff, students, and parents of minor aged students anytime there is a scheduled application of a pesticide at any of our college campus buildings. In that notification you will find the expected application date, name of the pesticide being applied, the EPA registration number of the pesticide, and other information. You will find our IPM plan on the web page **along with a notification of any planned pesticide applications**. Our web address is:

<https://tillamookbaycc.edu> Go to the Quick Links on the bottom of the webpage and click on Environmental News.

For each application of a pesticide – inside or outside – we are also required to post notifications in the vicinity of the application on that school campus. So on occasion you may see signs posted informing you of a pesticide application at a school, but please be assured that we are doing everything we can to keep these applications to a minimum and only using the safest of products to achieve the expected results. There will be contact information on the application posting signs of who you can call if you ever have questions about what is going on or what products are being used.

We will be spraying outside only for weeds at our Main Campus (4301 3rd Street) and PRI Building (4506 Third Street) sites on Saturday July 23rd, 2022.

An OSU faculty member with expertise in pesticide toxicology has reviewed all of the pesticides that we use, and they meet the requirements of a “low-impact pesticide” as defined by ORS 634.705 (5). They never have a label category that is higher than Caution, and contain no known carcinogens. If you have any questions or concerns about these products, I encourage you to contact the National Pesticide Information Center at <http://npic.orst.edu>

I would also encourage you to review the entire OSU School IPM program at <https://blogs.oregonstate.edu/schoolipm/> to see what we are doing and how we go about improving the condition of our College to create a healthier environment for your children. It is all about educating, communicating, and eliminating pests through cleaning and organizing our environment. We are sealing up our buildings, eliminating clutter, keeping food in plastic storage containers, eliminating leaks and drips in our plumbing, properly pruning our landscaping, and being more thorough in our cleaning efforts.

4301 THIRD STREET | TILLAMOOK, OR 97141

Through these efforts we are eliminating the three things that pests need to survive: Food, Water, and Shelter. We are also providing a healthier learning environment for your children, and saving the college precious dollars that would otherwise be spent on pesticides.

If you have questions you may contact me at Cell No. 503 812-0672

Thank you,

George Hastings
